

## EBV Employees Save Rainforest While Getting in Shape

For EBV employees, biking to work not only gave them a chance to contribute to a cleaner environment and get fit, but also provided them with a way to help save the rainforest.

From April to September, 104 employees participating in the "By Bike to EBV" program rode more than 53,000 kilometers to work or to public transportation, preventing more than 9,000 kilos of carbon dioxide from being emitted. Moreover, EBV donated .15€ per kilometer cycled – a total of 8,000€ – to Rettet den Regenwald e.V, an organization committed to saving the rainforest.

Because the "By Bike to EBV" program was such a success, EBV has extended it through the end of March 2009. To encourage employees to continue to participate during the winter's tough weather conditions, EBV will increase its donation to .25€ per cycled kilometer.
